DEVOPS STACK

- **01 PROVISION** — Terraform · OVH Public Cloud · OpenStack · AWS
- **02 SHIP** — GitHub Actions · Harbor registry
- **03 RUN** — Docker Compose · Traefik · Caddy · FrankenPHP · Linux
- **04 OBSERVE** — Prometheus · Grafana · Loki · Alloy · Alertmanager

PROFILE

ISEP engineering graduate with three years as an apprentice at PharmaGDD, an online pharmacy. I work on the backend and, more and more, on the infrastructure: production monitoring, moving an extranet from GCP to OVH with Terraform, GitHub Actions deployments. Looking for a DevOps / Cloud role to automate infrastructure and make production more reliable.

EXPERIENCE

Software Engineer Apprentice · PharmaGDD, Paris

Sept 2023 — Nov 2, 2026

Online pharmacy: e-commerce rebuild (Symfony / Sylius 2) and its OVH infrastructure.

> **OBSERVABILITY** Set up production monitoring: metrics, logs and Slack alerts versioned in Git (VMs, MySQL, Redis, Elasticsearch, 5xx errors, p95 latency).

> **CLOUD** Moved an extranet from **GCP to OVH**, infrastructure described in Terraform (private network, bastion, DNS, backups). Production cutover in **40 minutes**. case study ↗

> **CI/CD** Production deploys through GitHub Actions, traceable to the commit. Automated build and release of the desktop app.

> **DATA** Spring Batch ETL for the v1 → v2 migration: **73M rows** at **~1.8M rows/min**, replayed nightly on the production dump with integrity checks. case study ↗

> **DEV** Symfony / Sylius 2 backend for the rebuild. C# / .NET desktop app in production: drives 4 sensors and sends the measurements to the ERP. case study ↗

STUDENT JOBS Delivery driver (Paris, 2023–24) · Maintenance agent, EQUIPMEDICAL (Caen, summers 2023 and 2024) · Crew member, McDonald's (Caen, 2019–20)

SIDE PROJECTS

Home Infrastructure ↗ OVH VPS · Docker Compose
Self-hosted personal infrastructure: TLS reverse proxy, 2FA authentication, monitoring, S3 storage and messaging.

AWSPlayground ↗ Terraform · LocalStack
AWS labs in Terraform (IAM, Lambda + SQS, DynamoDB, CloudWatch) to prepare for the Solutions Architect exam.

PackageHeroMock ↗ Rust
Simulates the PackageHERO scale and laser to test HeroLink without the hardware.

CERTIFICATIONS

- ✓ **AWS Certified Cloud Practitioner** — Amazon Web Services
- ○ **AWS Certified Solutions Architect – Associate** — Amazon Web Services · in progress
- ✓ **Junior Cybersecurity Analyst Career Path** — Cisco
- ✓ **Foundational C# with Microsoft** — freeCodeCamp

SKILLS

LANGUAGES
Bash, Python, Java, PHP, C#

DATA
MySQL (replication, backups), Redis, Elasticsearch, Neo4j

SECURITY
Bastion and ProxyJump, SSH hardening, security groups, TLS, 2FA

FRAMEWORKS
Symfony, Sylius, Spring Batch, FastAPI, .NET

CURRENTLY LEARNING

Kubernetes · AWS CDK · Microservices

EDUCATION

Engineering degree, software engineering
ISEP Paris · apprenticeship
2023 — 2026

CPGE TSI (engineering prep school)
Lycée Marcel Sembat, Rouen
2021 — 2023

LANGUAGES

French	native
English	TOEIC 850

OUTSIDE CODE

Triathlon · Marathon · Blender 3D · Game dev
